Should be the same except for SW shipyard...might be a little harder access and so might need to do tomorrow is why I didn't list. If we have time and can get to SW, will do today. Some targets based on wind direction as if not right, data not useful. Sorry can't text easily-call if u need more.

Jhana – See the list below, which has minor differences from the list in your update yesterday.

We need to assess the following 6 facilities today, using the TAGA:

Southwest Shipyard - Brady Island,
Channel Energy Center,
Texmark Chemicals,
VOPAK - Galena Park Terminal,
United States Gypsum, and
Targa Resources - Galena Park Terminal.

Subject: Re: manchester area

Tomorrow the TAGA needs to clear Manchester neighborhood areas around six facilities that the REOC will provide to you. The REOC should receive this list of facilities

this evening or first thing tomorrow morning. Once this is completed, it our understanding there will be no more tasks for the TAGA in the Manchester area.

It is my understanding that the Manchester area is done, if I understand Jhana correctly. Is the EU and others satisfied with the amount and coverage of the data for this area? Is it OK for Jhana to move on to other priority areas with the TAGA? If so, please advise on other priority areas for the TAGA. Currently, my Branch recovery operations have no current tasking for TAGA.
